DUNGEONS BUT NO DRAGONS

DUNGEONS BUT NO DRAGONS

OVERVIEW

- ▶ Built an online multiplayer game using Javascript
- ▶ Each player is fighting against each other and the mobs
- ▶ Once the player has killed a mob, coins at that location can be collected
- ▶ We have the option to customize and create our own maps using the Map Editor

TECHNOLOGIES USED

- ▶ Built entirely using Javascript
- ▶ Deployed using Heroku
- ▶ Built several features from scratch including:
 - ▶ Game Engine
 - ▶ Simple 2D Physics Engine + Collision Detection

FUTURE PLANS

- ▶ Improved graphics and animations
- ▶ More efficient path finding for faster performance and this will enable more mobs
- ▶ Vendor buying and selling based on how many coins the user has collected
- ▶ 4+ directional changes in perspective (rotating the camera in different angles)
